plast

Your custom catalog
Your North Star in the firmament of extrusion.

About us

German Plast srl is a leading company in the field of designing and producing plastic items through injection molding and extrusion processes, as well as the creation of molds. In over half a century of history, the Fioretti family, the driving force behind this enterprise, has gained solid experience in the sector, providing innovative and high-quality solutions to its partners.

Mission

Our mission is to provide tailor-made plastic products capable of meeting our partners' specific needs while ensuring excellence in terms of quality, reliability, and sustainability.

Vision

We aim to be the best possible partner for companies needing mold-making and injection molding services-a complete and customized service encompassing all stages of the production process, from design to assembly.

Extrusion

Plastic extrusion is a versatile technique that allows us to transform polymeric and innovative materials into continuous products such as tubes and profiles. An efficient process that minimizes waste and ensures precision for every type of application. Tailor-made solutions, always with a sustainable and innovative profile.

The advantages of the extrusion catalog

The catalogue of extruded plastic profiles is designed to offer both practicality and flexibility.

It provides customers with a wide range of ready-to-ship standard components for the furniture sector, while also leaving room for fully customized solutions tailored to specific needs without the usual mold costs for the client.

Lead times are competitive for both standard and custom products.

No warehouse stock

No mold costs
